

## **TAKRAG Ref: 4071 TECHNICAL DATA SHEET**

For a perfect paint finish at an economical cost

### **Introduction:**

Dust, fluff and grit particles are a major source of paint defects causing nibs, rough finishes and centers of weaknesses and corrosion. Long experience has shown that TAKRAG is the only safe and economical method ensuring completely dust - free surface onto which paint can be applied. Gramos chemical India Private Limited, manufacturer of TAKRAG, is the foremost manufacturer in India and is supplying Takrag to most Indian car manufacturers and to assembly plants throughout India. The impregnates that makes TAKRAG tacky are manufactured solely for us for our own use. They are to our own formulae and are chemically compatible with all modern paint finishes, non - acidic, non-drying, non-staining, will not subject to spontaneous combustion and uniform in tack and quality. Takrag is indispensable in vehicle paint shop. TAKRAGS have many beneficial applications in most industrial production finishing processes. TAKRAG have many non - industrial applications too. Increasing number of decorators and model makers are using TAKRAG to help to achieve the perfect finish they strive for. Press shops and mould shops are now using TAKRAG to improve the finish on their jobs.

### **Application:**

A surface ready for spraying, lettering and countless other jobs involving the application of paint, printing inks, lacquers, varnishes etc. simply by light wiping down the surface area involved all specks of dust and dirt are removed quickly and effectively trapped within the TAKRAG. With one quick wipe, TAKRAG ensure completely dust and fluff free surface. The soft tack absorbent impregnates ensures maximum pick up and holding power. All dust and dirt particles likely to cause blemishes are firmly held and none can be transferred or shaken loose to become airborne and settle elsewhere. Care must be taken that surface to be wiped must be at ambient temperature and dry, free from solvent or water which may lead to transfer of varnish from the cloth to body.

### **Conclusion:**

In developing the system, M/s. GRAMOS CHEMICALS INDIA PRIVATE LIMITED has been able to draw from the wealth of expertise and knowledge within our parent company over 30 years experience as manufacturing TAKRAG for all types of United Kingdom industries & 10 years Indian Industries that incorporate paint in their process. The TAKRAG ranges of products are constructed from an open weave impregnated cotton fabric which combines high dust absorbency with strength and wear resistance. The ability to call on this expertise and knowledge has resulted in the development of the TAKRAG, which has the following benefits:

1. One single quick wipe will collect invisible and visible dust.
2. Ensures completely dust and fluff free surface
3. Surface being tacky collects all the dust particles on it and does not allow to transfer or to become air-borne to settle on the other surface.

### **Packing:**

250 pieces per carton for standard TAKRAG

Note: Standard Specification: CODE C13245, SIZE - 32 x 90 Cms +/- 2 Cms, VARNISH CONTAIN 45 % +/- 2%. Range of TAKRAG can be supplied according to the customers requirement. Taylor made Size and Varnish % to suit individual application for which product code with specification will be issued on request, which needs to confirm by customer before release of order.

### **Warranty:**

It should be appreciated that the information given here is to the best of our knowledge, true and accurate. However, since conditions under which our products are used are beyond our control, recommendations are made without warranty or guarantee.
